2020

Senior High School

CERTIFICATES

Database Programming with SQL

03/2022 - Present

Scrum Foundation Professional Certifcate - SFPC

03/2022 - Present

SUMMARY

My name is Muhammad Ilman Aqilaa, As an enthusiastic individual in the technology development industry, particularly in website development, I have a strong interest in the world of website development. With my background as a programmer, I possess knowledge and skills in utilizing various development tools such as Visual Studio Code, XAMPP, Unity, and other commonly used tools in the development process. Additionally, I have experience using programming languages such as PHP, Python, and Java, with PHP being the language I frequently use. I have experience in designing web application systems, and I also enjoy designing applications with Augmented Reality using Unity as the development tool. For project storage, I am accustomed to using GitHub as the repository. I am fascinated by the process and technical aspects behind website and game creation, which is why I am highly motivated to continue learning and exploring how systems are developed.
